

**Complete Range  
Enclosure Systems**

# BERNSTEIN AG – A Success Story

## **Safety for man and machine**

BERNSTEIN AG ranks among the world's leading providers of industrial safety technology. With our comprehensive range of switches, sensors, enclosures, suspension systems and other components for industrial applications, we offer our customers effective and versatile solutions.

In-depth market knowledge, the close proximity to end users as well as years of experience in mechanical engineering and electronics are reflected down to the last detail in our products.

By conforming to international safety guidelines, our products perfectly integrate in individual system solutions. Our focus is complete commitment to safety for man, machine and industrial processes.

## **Our expertise for your safety**

With sound application expertise we support our customers from all branches of industry in the planning and implementation of systems designed to meet stringent safety requirements. In addition to classic plant and machine construction, we look after customers in the lift construction, automotive, agriculture, conveyor construction, automation engineering, wood-working, renewable energy, AS-Interface and EX.

BERNSTEIN Safe Solutions

## Our philosophy

Customer Satisfaction is our number one priority. For us, Quality is more than making a good product, it's about designing them to perfectly match ALL of your needs.

Customized Solutions are fully integrated into our business and form part of our everyday working life. Employees are treated as our greatest asset as they are responsible for the quality and success of our products. All BERNSTEIN TEAM members are trained and educated to the highest possible standard so they can deliver "Best in Class" Service and Support. The BERNSTEIN TEAM will support you both personally and professionally, working together we will provide you with the best Safe Solution – for any size of project.

## Future-proof solutions

Our objective is to actively influence technical innovation and modern application solutions. BERNSTEIN has therefore always been at the centre of defining trends in technology. With an unwavering commitment to the future we will continue providing the best possible answers in terms of technology, ecology and economic efficiency.

That is our definition of progress!

# BERNSTEIN AG

## The Product Lines

### Switch system

#### Switch system – Economy meets safety

BERNSTEIN electromechanical switches offer a convincing price/performance ratio and impress with their extreme reliability for many different operating voltages. The range extends from limit switches, encapsulated in insulating material or metal, through foot switches to safety switching devices. The AS-i compatible products save time and material in installation and provide cost advantages in operation. The comprehensive range of designs and sizes, the possible switching functions and the choice of actuators make virtually any application reality.

### Sensor systems

#### Sensor systems – Compact intelligence

The extremely fast and exceptionally precise BERNSTEIN sensors operate without interference and wear in all applications. The tried-and-tested reliability and the compact dimensions are greatly appreciated in all branches of industry. Matching the specific application, in addition to ultrasonic sensors and level switches, customers can choose from a wide range of inductive, capacitive, magnetic or optical sensors. Alongside the comprehensive standard range of sensors, we also offer comprehensive development and design for individual solutions.

## Enclosure systems

### Enclosure systems – Function and design

With its long tradition in manufacturing enclosures, BERNSTEIN combines superior enclosure technology, designed for encapsulating a diverse range of applications, with ultramodern and variable suspension systems. An extensive range of aluminium and plastic terminal boxes as well as the wiring and circuitry in standard and control enclosures conforming to specific customer requirements round off the product portfolio. Our enclosures conform to standards used in medical technology, industry as well as food and EX applications.

# Product Line Enclosure Systems

### **Enclosure systems – Function and design**

Functional design, high quality and durability are essential prerequisites for effective system integration. We incorporate customised wiring and specific component configurations in our expanded enclosure production process, which includes the preassembly of mounting rails or the installation of PLC/IPS solutions of all renowned manufacturers. In cooperation with our customers, this extremely pragmatic project planning results in fast and exceptionally reliable solutions.

In the modular aluminium control enclosure systems we combine state-of-the-art design with outstanding technical features to individually and efficiently encapsulate industrial controllers and operator panels. Our extensive range of suspension systems perfectly enhance this product portfolio.

The same meticulous attention to detail is reflected in our range of stainless steel control enclosures. These products are ideally suited for applications where the use of stainless steel is essential on account of special requirements and ambient conditions. With special sizes, different surface finishes and the comprehensive range of stainless steel suspension systems we offer unlimited scope for individualisation.

All state-of-the-art BERNSTEIN suspension systems are characterised by variable layout, advanced design and ease of installation.

### **Integrated diversity**

Modern industrial design, perfected ergonomics and a host of combinable components create innovative system solutions based on modular principles. BERNSTEIN standard enclosures with quick-release fasteners, flexible internal articulated hinges and international approvals give our customers ample scope in the choice of enclosures best suited for their specific application.

With a range of materials such as plastic, metal and stainless steel, BERNSTEIN has the ideal solution for all applications. Backed by our quality manufacturing guarantee we will do whatever it takes to make sure that BERNSTEIN enclosures provide the perfect solution.

### **Services and standards**

- Bespoke solutions
- Lower costs thanks to all-encompassing system
- Supply of complete systems and their project integration
- System components procured by BERNSTEIN
- Compliance with applicable product and industrial standards
- International approvals

# BERNSTEIN System Solutions

## Expertise from under one roof

### Comprehensive range of services from BERNSTEIN enclosure systems

BERNSTEIN specialises in products that reliably protect your technical equipment from damage, the environment or unauthorised access.

Bespoke, individually designed system solutions are based on tried-and-tested enclosure technology combined with BERNSTEIN suspension systems.

Tailored wiring and the installation of components can now be integrated directly in the expanded enclosure production process.

Starting with the preassembly of mounting rails and terminals through cable configuration to component mounting and complete wiring in the enclosure.

### BERNSTEIN – Your solution specialist.

### New system integration approaches such as the installation and preassembly of:

- Power supply systems
- Operating and control elements
- Membrane keypads
- Displays, power supply and data cables
- I/O assemblies
- Ethernet components
- PLC/IPC solutions of all renowned manufacturers

### Your benefits:

- **Solution specifically tailored** to customer requirements
- System solution phased directly into production process
- Compliance with **applicable product and industrial standards** (EX, IP-classes)
- Administration expenditure and costs reduced by
  - **Purchase and stock keeping** of components by BERNSTEIN
  - No residual quantities of individual components
  - Use of standard components
  - No costs incurred for **assembling individual components** – delivery of complete systems
  - Acceptance of part projects by BERNSTEIN, therefore, reduced assembly and component mounting costs
- **Integration** of BERNSTEIN switch and sensor systems
- System components procured by BERNSTEIN

## Combination of BERNSTEIN enclosures and customer technologies

As a solution specialist, BERNSTEIN has available core expertise in mechanical applications and a comprehensive range of tools to suit the most diverse configuration requirements.

- **Customised enclosure modifications, freely selectable dimensions and configurations created by:**
  - Holes
  - Threads
  - Apertures
  - Pre-punched blanks
- **Preassembly, mounting and wiring of:**
  - Mounting panels and support rails
  - Hinges and mounting brackets
  - Terminals and screwed cable glands
  - Circular connectors
- **Individual powder coating also available in special colours in own production process**

# EX

## EX-approved products for potentially explosive atmospheres

- Ex e, Ex ia and Ex e/ia terminal boxes made from polyester and aluminium
- Ex d / Ex tb limit switches, rope pull switches and foot switches
- Ex mb / Ex tb magnetic switches
- Ex ib inductive Namur sensors

Services, training, system solutions, project- and customer-specific solutions.

### Terminal enclosures and empty enclosures

Only materials that correspond to the temperature range required for Ex enclosures are used in these enclosures and components.

The minimum type of protection rating of all enclosures and screw connections is IP64, other protection classes available on request.

The latching devices on the enclosures are available as captive screw connections.

Various CA versions are available with flange plates.

All built-in components must conform to the relevant approvals.

### Momentary contact, cable pull and foot switches

An Ex d-certified switching element lies at the core of these Ex-approved switches.

It is mounted in the corresponding switch enclosures. The mechanical actuator and its installation are certified separately.

The approval of additional actuators and switch enclosures from other series is possible on request.

All switches and momentary contact switches feature one NO contact and one NC contact.

### Magnetic switches, inductive Namur sensors

For magnetic switches, protection against ignition energy is achieved by encapsulation. For Inductive Namur sensors, protection is achieved by the principle of intrinsic safety.

Magnetic switches and Namur sensors have a Factory fitted connection cable.

This cable is permanently attached to the body and forms part of the approval.

All sensors are certified for a surface temperature of + 80 °C.

## Services offered by the BERNSTEIN-EX experts:

- Approval of a stainless steel enclosure with freely definable dimensions
- Approvals assistance for plant operators
- Approval of switching and control elements in all enclosures
- Approval of plug-in devices in all enclosures
- Component mounting and wiring of enclosures according to customer specifications
- Training courses for planners and plant operators
- Cross-product system solutions
- Customer-specific development and project management on request
- TR (EAC) and NEC (North America) approvals on request
- Approval according to IEC Ex on request

## Empty enclosures for use in potentially explosive atmospheres

### EX-U certified empty aluminium CA enclosures

BERNSTEIN CA enclosures have been tested by an internationally recognised and certified inspection authority and certified through type approval testing for use in areas with potentially explosive dust and gas atmospheres. Used as terminal and control enclosures, the aluminium pressure die-cast enclosures are designed to accept corresponding mechanical and electrical equipment. The enclosures come with operating instructions, type identification plate and CE Declaration of Conformity. Either an EPDM or silicone seal can be used. The enclosures can be fitted at the factory with external hinges.

External dimensions in mm	Type	Art. No. with silicone seal	Art. No. with EPDM seal

## EX-U certified empty polyester CP enclosures

BERNSTEIN CPG and CPS enclosures have been tested by an internationally recognised and certified inspection authority and certified through type approval testing for use in areas with potentially explosive dust and gas atmospheres. Used as terminal and control enclosures, the glass-fibre reinforced polyester enclosures are designed to accept corresponding mechanical and electrical equipment. The enclosures come with operating instructions, type identification plate and CE Declaration of Conformity. Either an EPDM or silicone seal can be used. The enclosures can be fitted at the factory with external hinges.

# General Technical Information

## Enclosure selection criteria

The following questions are designed to help you find the optimum enclosure for your specific application. In addition to the given criteria, your individual requirements are also of decisive importance.

### 1. How big should the enclosure be?

- PC-board size
- Number of terminals
- Number of screwed cable glands per side
- etc.

### 2. What ambient conditions should be taken into account?

- Moisture
- Climatic conditions
- Temperature
- Chemical exposure in the form of cleaning agents, oils, lubricants, etc.
- Electromagnetic compatibility
- etc.

### 3. What mechanical loads will the enclosure be subjected to?

- Impact
- Pressure
- Bending
- etc.

### 4. What additional features are required?

- Special coating:  
Special colour, special finish (chromalizing, EMC protective paint, etc.), screenprint and labels etc.
- Connectors
- Screw connections (number per side)
- Inspection window
- Preassembly with mounting panel, mounting rails, terminals, external and internal articulated hinges, etc.
- etc.

### 5. What other components can be installed for you?

- Power supply systems
- Operating and control elements
- Membrane keypads
- Displays, power supply and data cables
- I/O assemblies
- Ethernet components
- PLC/IPC solutions of all renowned manufacturers
- etc.

You will find further details in Section "System Solutions" from Page 12 onwards.

### 6. Which type of approval do you need?

You find all current approvals on [www.bernstein.eu](http://www.bernstein.eu)

### 7. What else can we install for you?

Talk to us. We will help you realise your challenge.

## Definition of Protection Classes in accordance with IEC 60529, VDE 470 T 1

The protection class of an enclosed device denotes the degree of protection. The degree of protection includes the protection of persons against contact with parts under voltage and the protection of equipment against the infiltration of foreign bodies and water. BERNSTEIN standard enclosures largely correspond to protection class IP65.

### Protection class designation

In accordance with DIN EN 60529 the protection class designation consists of a two-digit code.

Meaning of 1<sup>st</sup> digit:

Protection class against contact and infiltration of foreign bodies

Meaning of 2<sup>nd</sup> digit:

Protection class against infiltration of water

### Example: Protection class IP65

1. Digit (6):

Complete protection against contact with components under voltage or with internal moving parts = protection against dust infiltration

2. Digit (5):

A water jet directed from all directions at the enclosure must not have damaging effects = protection against water jets (hoseproof)

Foreign body protection			Moisture protection		
1 <sup>st</sup> digit	Meaning	Explanation	2 <sup>nd</sup> digit	Meaning	Explanation
IP0X	No protection		IPX0	No protection	
IP1X	Protection against foreign bodies with a diameter of 50 mm or greater	Solid object (sphere, Ø 50 mm) must not fully penetrate	IPX1	Protection against dripping water	Vertically falling droplets must not have a damaging effect
IP2X	Protection against foreign bodies with a diameter of 12.5 mm or greater	Solid object (sphere, Ø 12.5 mm) must not fully penetrate	IPX2	Protection against dripping water when the enclosure is tilted at an angle of up to 15°	Vertically falling droplets must not have a damaging effect when the enclosure is tilted at an angle of up to 15° either side of the perpendicular
IP3X	Protection against foreign bodies with a diameter of 2.5 mm or greater	Solid object (sphere, Ø 2.5 mm) must not fully penetrate	IPX3	Protection against spray water	Water sprayed at an angle of up to 60° either side of the perpendicular must not have a damaging effect
IP4X	Protection against foreign bodies with a diameter of 1 mm or greater	Solid object (sphere, Ø 1 mm) must not fully penetrate	IPX4	Protection against splash water	Water sprayed against the enclosure from any direction must not have a damaging effect
IP5X	Protection against harmful dust deposits	Dust penetration is not completely prevented. However, the amount of penetration must not impair the function or safety of the device.	IPX5	Protection against hose water	Water sprayed in jet from against the enclosure from any direction must not have a damaging effect
IP6X	Protection against dust penetration, dustproof	No penetration of dust at a negative pressure of 20 mbar in the enclosure	IPX6	Protection against strong hose water	Water sprayed in strong jet from against the enclosure from any direction must not have a damaging effect
			IPX7	Protection against the effect when temporarily submerged in water	Water must not enter in harmful quantities when the enclosure is submerged under standardised pressure and time conditions
			IPX8	Protection against the effects of continuous immersion in water	Water may not ingress in a volume that would cause harmful effects when the shell is continuously submerged in water under conditions <b>agreed between manufacturer and user</b> . The conditions must, however, be more difficult than those for code number IPX7.
			IPX9K	Protection against water during high pressure/steam jet cleaning (as per DIN EN 40050, Part 9)	Water sprayed at greatly increased pressure against the enclosure from any direction must not have a damaging effect

## General Technical Information

### Mechanical strength

Selection is based on the corresponding properties of the material to be used.  
The table below provides an overview of the main material properties of aluminium, polycarbonate, ABS, polyester and stainless steel.

Material property	Standard	Unit	Aluminium	Polycarbonate	ABS	Polyester	Stainless steel
Density	DIN 53479	g/cm <sup>3</sup>	2.65	1.2	1.05	1.8	7.9
Impact resistance	DIN 53453	mJ/mm <sup>2</sup>	150 – 300	65	60	80	
Toughness	DIN 53453	mJ/mm <sup>2</sup>	90 – 200	20	10	4	
Tensile strength	DIN 53455	N/mm <sup>2</sup>	180 – 300	65	43	45	500 – 700
Elongation of break	DIN 53455	%	60 – 90	90	20	20	< 60
Modulus of elasticity (bending test)	DIN 53457	N/mm <sup>2</sup>	75000	2300	2100	6500	200000
Flexural stress at given strain	DIN 53452	N/mm <sup>2</sup>		95	90	100	
Flammability	UL 94	Class		V 2	HB	V 0	
Volume resistivity	DIN 53482	Ohm x cm		10 <sup>15</sup>	10 <sup>13</sup>	3 x 10 <sup>14</sup>	
Surface resistance	DIN 53482	Ohm x cm		≥ 10 <sup>15</sup>	4 x 10 <sup>14</sup>	> 10 <sup>12</sup>	
Dielectric strength	DIN 53481	kV/mm		25 – 40	24	25 – 40	
Thermal conductivity (20°C)	DIN 52612	W/mK	120 – 160	0.21	0.18	0.25	16.3
Electrical conductivity (20°C)		m/Ohm mm <sup>2</sup>	15 – 22				

## Chemical resistance

The table below provides an overview of the chemical resistance of BERNSTEIN aluminium, polycarbonate, ABS, polyester and stainless steel enclosures to chemicals commonly used. The specified values are reference values relating to different concentrations and ambient temperatures that have varying influences on materials. This also applies to simultaneous exposure to several chemicals. Corresponding trials are therefore recommended.

All tests were carried out at room temperature. The chemical resistance may change in combination with different media. Therefore, no responsibility can be accepted for the correctness of this information.

Chemical	ABS	Polycarbonate	Polyester	Aluminium	Stainless steel
Acetone	–	–	–	+	+
Formic acid	40%	–	+	o	+
Ammonia	25%	–	–	+	□
Benzine	–	o	+	+	+

Trichloroethylene	–	–	–	–	–	–
Water (distilled water, river water, tap water, sea water)	+	+	+	80°C	+	40°C
Tartaric acid	o	+	+	+	□	+
Xylene	–	–	–	–	–	–
Zinc sulphate	+	+	+	+	□	+
Citric acid	+	+	+	+	+	10%

+: Resistant to all concentrations  
 %: Resistant to max. % concentrations  
 o: Conditionally resistant  
 –: Not resistant  
 □: No data  
 +/-: Suitability strongly influenced by the specific substance or concentration

## Quality manufacturing guarantee

### **Reliable, flexible, personal: BERNSTEIN System Solutions**

Outsourcing is a matter of trust. You need a competent service provider who you can rely on, who is flexible and who is always prepared to listen.

BERNSTEIN is your dependable partner.

With more than 30 years of experience to look back on, we offer comprehensive know-how in enclosure technology and corresponding applications.

Take advantage of the BERNSTEIN system solution service for enclosures with personal on-site support.

### **Benefit from all the advantages offered by BERNSTEIN!**

**You will find further information on system solutions on Page 12.**

## Our range of services for standard enclosure modifications:

- Standard enclosures perfectly tailored to your requirements
- Mechanical machining (even complicated contours) by CNC machining centres
- RoHS-compliant surface treatment for use in corrosive environments
- Special coating in accordance with RAL specification
- Screen print or engraving of enclosure surface
- Special coating and conductive seal for HF-proof version
- Installation of individual components from the BERNSTEIN range of accessories as well as other customer-specific components
- Electrical wiring of components according to your specifications

## Your benefits:

- Personal advice on site
- Reduced vertical integration
- The enclosure modified to your specification can be directly incorporated in your production process

## Standard Enclosures – General Technical Information

### Mechanical strength of standard enclosures

The illustration shows the suitability of different enclosure materials (standard enclosure) in terms of mechanical stress and corrosive environments.

### Manufacturing standard for standard enclosures

#### Technical information on enclosure manufacture

As an ISO-9001-2008-certified company, BERNSTEIN has defined a manufacturing standard that applies to all machining orders (unless other requirements are specified).

#### Dimension tolerances

When preparing details for enclosure machining (see following drawings, showing orientation of enclosure when set up for machining), tolerances used for the first machining operation on each set up, are according to ISO 2768-mH.

If other dimensions or reference edges are used, the following maximum general tolerances are applicable for the first machining operation on each enclosure per set up (see table below).

Tolerances between further machining operations compared to each other can be limited to  $\pm 0.1$  mm.

#### General tolerances Standard range

Material/enclosure type	General tolerance
CA-020 to CA-480	
Cast aluminium	DIN 1688
CT-50 to CT-91	
PC/ABS	DIN 16901
CP-140 to CP-460	
Polyester mats	DIN 16901

#### Minimum purchase quantities

In order to keep enclosure machining as cost-effective for the user as possible, the following minimum purchase quantities are suggested:

Designation	Minimum purchase quantity
CA-020 ... CA-080	20 pieces
CA-100 ... CA-190	10 pieces
CA-210 ... CA-310	10 pieces
CA-330 ... CA-480	5 pieces
CP-140 ... CP-195	20 pieces
CP-220 ... CP-320	10 pieces
CP-330 ... CP-460	5 pieces
CT-50 ... CT-76	20 pieces
CT-78 ... CT-89	10 pieces

These quantities should be regarded as the minimum, if the customised enclosures are to be produced economically. Production includes mechanical machining, special coating, screen-printing, engraving or assembly of accessories. BERNSTEIN will of course be pleased to advise you.

## Reference edges for manufacturing standard

### Series

CA-020 to CA-240, CA-270 to CA-300  
CT-50 to CT-82, CP-140 to CP-300

### Series

CA-250, CA-310 to CA-480  
CT-84 to CT-91, CP-320 to CPS-590

## The BERNSTEIN quick-release fastener and flexible internal articulated hinge

Invented and patented by BERNSTEIN – the quick-release fastener and its internal articulated hinge

- Reduced time and costs
- Easy to use

### 1. Press and turn by 90°

- Easy opening and closing

### 2. Simple connection check

- No need for mechanical testing

### 3. Safe

- Quick-release fastener is tensioned and snaps firmly in. Cover will not open when subjected to shaking and vibration.

### 4. Effortless mounting

- Self-latching and locking function ensures straightforward mounting or retrofit.

### Quick-release fastener/internal articulated hinge – for securing covers to enclosure bodies.

- Subsequent mounting possible without the need for mechanical machining.
- Strain relief and captive mounting of the cover are guaranteed.

The flexible internal articulated hinges can be easily fitted in the enclosures without the need for mechanical machining and reliably hold the enclosure cover after opening. The hinges provide effective strain relief and captive mounting of the enclosure cover

# Aluminium Enclosure Series CA

BERNSTEIN aluminium enclosures have a well proven record of success in encapsulating electrical, electronic or pneumatic components, while also being ideally suited for applications in potentially explosive atmospheres. All enclosures comply with protection class IP66 according to DIN EN 60529 (optionally IP67).

BERNSTEIN aluminium enclosures feature earthing screws (copper-plated, M4 or M6) in the body and in the cover for connecting PE conductors. The surfaces under the earthing screws are left blank. The screws for mounting the covers on BERNSTEIN enclosures are made from stainless steel and are held captive by the self-latching hinge integrated in the cover. The protection class (on the standard enclosure) is ensured by a factory-fitted seal. BERNSTEIN aluminium enclosures are finished as standard in RAL 7001 (silver grey).

BERNSTEIN uses pressure die-casting or gravity die-casting moulds to manufacture the aluminium enclosures.

The mounting flanges or even the earthing socket on the inside of the enclosure can be used for mounting and securing built-in components (mounting rail, mounting plate, pc board etc.). These mounting points on the inside of the enclosures are located at different levels and in different positions. The dimensioned drawings on the following pages show the relevant positions.

## Technical data

### Material

Aluminium pressure die-casting or gravity die-casting

### Seal

Foamed PUR seal  
Neoprene (CR) round cord (silicone-free),  
silicone round cord, EPDM round cord

### Cover screws

Stainless steel, captive, cross recessed head

Optionally:

- Stainless steel, captive hexagon socket head cap screws
- Sealed cover screws, steel (9 S 20 K), slot head (on request)

### Coating

Standard: RAL 7001 (silver grey)

Optionally:

- Special RAL colours
- Special coatings

### Temperature range of CA enclosures, standard powder-coated finish

–30°C to +80°C

Please contact us for higher temperature ranges.

### Temperature range of seals

Standard:

–40°C bis +100°C (PUR seal)

Alternatively:

–30°C to +80°C (Neoprene seal)  
–60 °C to +130°C (silicone seal)  
or rather –35°C to +100°C (EPDM seal)

### Protection class

IP66

IP67 with PUR seal

### Approbations

## Assembling of components

This is just a selection of possible assembly components that BERNSTEIN offers. Contact us, we can incorporate components from all leading manufacturers to satisfy your individual demand. You find further information about "System solutions" on page 12.

### Mounting plates

made from galvanised steel plate (thickness: CA-060 to CA-310, CA-350 to CA-400: 1.5 mm; CA-330, CA-420 to CA-480: 2.5 mm) for versatile mounting of built-in components.

### Mounting rails

conforming to Standards TS 15 or TS 32 and TS 35 made from steel; surface treated for accepting terminal blocks.

### Terminal blocks

of all renowned manufacturers are used.

### Earthing bars

made from galvanised steel for combining and connecting PE conductors.

### External mounting brackets

made from stainless steel for mounting enclosures without opening the covers. Variable mounting in 90°-steps thanks to contour in base of enclosure.

### External articulated hinges

for hinged mounting of enclosure cover. Opening range of cover approx. 155°. Cast aluminium (painted in RAL 7001 – specific colour according to enclosure specification possible). Machining is required for mounting on enclosures.

### Internal articulated hinges

for hinged mounting of enclosure cover. Opening range of cover approx. 95°. Stainless steel. Machining is required for mounting on enclosures.

### Silicon, EPDM or HF seal

with increased temperature resistance (see indications left side) or to protect sensitive electronic equipment against high-frequency radiation (HF seal). For a conductive connection, grooves and springs of the enclosure must be left blank.

### Cable glands

plastic cable glands (polyamide PAGV-2, RAL 7001) or brass cable glands. Sealing element CR/NBR. Temperature range: -20°C to +100°C (see also page 71). Other cable glands on demand.

# Polycarbonate and ABS Enclosures – Series CT

BERNSTEIN Series CT plastic enclosures are manufactured from high-grade polycarbonate or ABS. They are particularly suitable for encapsulating electrical and electronic components as well as complete small-scale controllers. All enclosures are available with a transparent polycarbonate cover. The enclosures correspond to protection class IP65 in accordance with DIN EN 60529.

Attachment bosses are provided on the base of the plastic enclosures for mounting built-in components. The components can be simply secured with the self-tapping mounting screws that come with the enclosure. With their attachment bosses in the base, BERNSTEIN plastic enclosures offer many direct mounting options. Mounting rails can be installed without mounting plates on the central bosses.

BERNSTEIN Series CT enclosures are supplied as standard with the quick-release fastener developed and patented by BERNSTEIN. The quick-release fasteners that come with the enclosure are simply pressed and locked into the holes in the cover. They are made from stainless steel. The protection class (on the standard enclosure) is ensured by a factory-fitted seal. BERNSTEIN polycarbonate and ABS enclosures are produced as standard in the colour RAL 7035 (light grey). On account of its material properties, the polycarbonate version offers specific advantages in terms of impact strength, UV resistance and operating temperature range. Thanks to the many attachment bosses in the body, both versions provide many direct mounting options.

## Technical data

### Material

Polycarbonate, transparent polycarbonate or ABS

### Seal

Foamed PUR seal  
Neoprene (CR) round cord (silicone-free)  
Silicone round cord

### Quick-release fastener

Stainless steel, self-locking, cross recessed head

Optionally:

Stainless steel cover screw, cross recessed head  
Sealed cover screws, galvanised steel, (9 S 20 K), slot head

### Colour

RAL 7035 (light grey)  
Other colours (dyeing) for large quantities available on request

### Temperature range of CT enclosures

–40°C to +120°C (Polycarbonate)  
–40°C to +80°C (ABS)

### Temperature range of seals

Standard:

–40°C to +100°C (PUR seal)

Optionally:

–30°C to +80°C (Neoprene seal)

–60°C to +130°C (silicone seal)

### Protection class

IP65

### Approbations

(Label on demand)

c UL us (polycarbonate enclosures)

c CSA us (polycarbonate enclosures)

## Assembling of components

This is just a selection of possible assembly components that BERNSTEIN offers. Contact us, we can incorporate components from all leading manufacturers to satisfy your individual demand. You find further information about "System solutions" on page 12.

### Mounting plates

Made from laminated paper (Pertinax) (thickness: CT-50 to CT-60: 1.5 mm; CT-62 to CT-78: 2.0 mm; CT-80 to CT-91: 2.5 mm) for versatile mounting of built-in components.

### Mounting rails

conforming to standards TS15 or TS32 and TS 35 made from steel; surface treated for accepting terminal blocks.

### Terminal blocks

of all renowned manufacturers are used.

### Earthing bars

made from galvanised steel for combining and connecting PE conductors.

### External mounting brackets

made from polycarbonate for mounting enclosures without opening the covers. Different bracket arrangement options offset by 90°. Colour RAL 7035.

### External articulated hinges

made from polycarbonate for hinged mounting of enclosure cover. Opening range of cover approx. 195°, latching at 170°, articulated hinges are simply pressed into holes (CT-88: secured by screws).

### Flexible quick-release fastener/internal articulated hinges

for captive mounting and strain relief for enclosure cover. Cover opening range > 180°. Stainless steel with injection-moulded polyamide ends.

### Silicon, EPDM or HF seal

with increased temperature resistance (see indications left side) or to protect sensitive electronic equipment against high-frequency radiation (HF seal). If a HF seal is used, an additional coating of the inside of the enclosure is required.

### Brass press-in bushes

with metric fastening screws M3 (M4 on CT-88), for mounting built-in components with metric screws in the mounting bushes in the enclosure body.

### Cable glands

Euro-2000 (Euro-Top) screwed cable glands, plastic (polyamide 6, RAL 7035), including integrated strain relief. Sealing element NEOPRENE. Temperature range: -30°C bis +80°C (see also page 71). Other cable glands on demand.

## Notes

## Polyester Enclosures – Series CP

BERNSTEIN Series CP and CPS polyester enclosures are produced from highgrade glass fibre-reinforced polyester. Thanks to their reduced surface resistance ( $R_o < 109 \text{ Ohm}$ ), the black polyester enclosures meet the requirements for Ex applications. Polyester enclosures are therefore particularly suitable for accepting and encapsulating electrical and electronic components as well as control components in harsh environments or potentially explosive atmospheres (see Page 14). All enclosures achieve protection class IP66 in accordance with DIN EN 60529 (optionally IP67).

Corresponding to their size, BERNSTEIN polyester enclosures feature M4 or M6 mounting elements in the enclosure body. These mounting bushes are embedded in a flange on the narrow sides of the base and accept mounting plates, mounting rails, pc boards etc.

The captive stainless steel cover screws are retained by a self-latching element integrated in the cover. The threaded bushes for mounting the cover are also made from stainless steel. The protection class (on the standard enclosure) is ensured by a factory-fitted seal. The polyester enclosures are available as standard in grey (RAL 7000, squirrel grey) or black (RAL 9005, jet black) material.

### Technical data

#### Material

Glass fibre-reinforced polyester in grey or black

#### Seal

Foamed PUR seal  
Neoprene (CR) round cord (siliconized), EPDM round cord

#### Cover screws

Stainless steel, captive, cross recessed head  
Optionally:  
Socket head cap screws, stainless steel, captive  
Sealed cover screws, stainless steel, slot head

#### Colour

RAL 7000 (squirrel grey)  
bzw. RAL 9005 (jet black)  
Other colours (coating or dyeing) available on request for large quantities.

#### Temperature range of CP enclosures

–60°C to +165°C

#### Temperature range of seals

Standard:  
–40°C to +100°C (PUR seal)  
Optionally:  
–30°C to +80°C (Neoprene seal)  
–60°C to +130°C (silicone seal) or  
–35°C to +100°C (EPDM seal)

#### Protection class

IP66  
IP67 with PUR seal

#### Approbations

Germanischer Lloyd  
c UL us (Label on demand)  
c CSA us (Label on demand)  
ATEX, IECEx

## Assembling of components

This is just a selection of possible assembly components that BERNSTEIN offers. Contact us, we can incorporate components from all leading manufacturers to satisfy your individual demand. You find further information about "System solutions" on page 12.

### Mounting plates

made from galvanised steel plate or laminated paper (thickness: CP-140 to CP 195 laminated paper 1.5 mm; CP-220 to CP-320 and CP-370 to CP-460 steel plate 1.5 mm; CP-330 steel plate 2.5 mm) for versatile mounting of built-in components.

### Mounting rails

conforming to Standards TS 15 or TS 32 and TS 35 made from steel; surface treated for accepting terminal blocks.

### Terminal blocks

of all renowned manufacturers are used.

### Earthing bars

made from galvanised steel for combining and connecting PE conductors.

### External mounting brackets

made from metal for mounting enclosures without opening the covers. The brackets are always fitted across the shorter sides of the enclosure.

### External articulated hinges

for hinged mounting of enclosure cover. Opening range of cover approx. 155°. Cast aluminium (painted in RAL 7001 – specific colour according to enclosure specification possible). Machining is required for mounting on enclosures.

### Internal articulated hinges

for hinged mounting of enclosure cover. Opening range of cover approx. 95°. Stainless steel. Machining is required for mounting on enclosures.

### Silicon, EPDM or HF seal

with increased temperature resistance (see indications left side) or to protect sensitive electronic equipment against high-frequency radiation (HF seal). If a HF seal is used, an additional coating of the inside of the enclosure is required.

### Cable glands

plastic cable glands (polyamide PAGV-2, RAL 7001) or brass cable glands. Sealing element CR/NBR. Temperature range: -20°C to +100°C (see also page 71). Other cable glands on demand.

## Control Enclosures by BERNSTEIN

Design aspects along with modularity, functionality and ergonomics, are rapidly becoming more and more important for plant and machinery manufacturers, especially when selecting the appropriate control enclosure for their machines and installations. To meet the increasing demand for aesthetically pleasing enclosures, we have developed a new BERNSTEIN Control Enclosure System. See for yourself.

### Optimum heat dissipation due to single-walled sections

Due to the single-walled version of the aluminium sections, a good and passive heat dissipation that complies with the protection class IP65 is assured. For applications with an increased requirement for heat dissipation, wear resistant and maintenance-free ventilators or air conditioners are available.

### Suspension system attachment

The suspension systems from BERNSTEIN also combine functionality with attractive design. The high quality material is extremely stable, easy to clean, and simple and quick to install. An extremely high load capacity allows individual configurations for different requirements.

## Modular Aluminium Control Enclosure CC-5000 <sup>neXt</sup>

### Protection in its most beautiful form

The aluminium control enclosure CC-5000 neXt offers a unique design with a number of accessories such as the status light. The rounded contours ensure the enclosure is highly recognisable in machinery and mechanical engineering applications. Dimensions up to a maximum 1000 mm in height and width with possible installation depths from 53 to 334 mm.

## Modular Aluminium Control Enclosures CC-4000 and CC-4000 SL

The technical features of the CC-4000 enclosures encapsulate industrial controllers and operator control panels for centralised and decentralised automation in production processes. Thanks to the modular design, the enclosure dimensions can be freely selected (up to 800 x 800) with depths ranging from 52 mm up to maximum 646 mm.

The CC-4000 SL has an elegant and lean profile design, making the complete machine and system appear modern and dynamic.

## Modular Aluminium Light-Duty Control Enclosure CC-3000

The CC-3000 is especially suitable for encapsulating control units, industrial computers and display components. It can be freely selected in height and width up to a maximum dimension of approximately 600 x 600 mm.

Different enclosure depths are possible due to the combination of aluminium sections (120 mm and 200 mm) with the additional door section (55 mm). BERNSTEIN offers sections in standard and handle versions.

# Modular Aluminium Control Enclosure CC-5000 neXt

## Product features

- Custom versions can be supplied to meet individual customer specifications (see "Checklists" chapter)
- Innovative and modern industrial design
- Rounded edges, no risk of physical injury
- High-quality extruded aluminium sections (naturally anodised)
- Customised colours from RAL range
- Single-walled sections that provide outstanding heat dissipation
- Integrated recessed grips for simple handling
- Protection class IP65
- Operating temperature -30 °C to +80 °C
- Internally mounted front panel
- Door configurations for direct access to the interior
- Slimline design for configuring flat screen systems

## Material

- |  |                   |
|--|-------------------|
| ● Extruded sections                                      | Aluminium         |
| ● Die-cast corners                                       | Aluminium         |
| ● Die-cast caps  | Aluminium         |
| ● Sealings between section and corner module             | PUR               |
| ● Sealings for front panel and rear panel                | EPDM, PUR and PVC |
| ● Hinge (for section combinations)                       | Aluminium         |
| ● Articulated hinge (for enclosure with single sections) | Aluminium         |
| ● Front panel, rear panel                                | Aluminium         |

## Colour

- Sections naturally anodised (standard)
- Front panel, rear panel naturally anodised (standard)
- Corner modules RAL 9006, white aluminium (standard)
- All components can be optionally powder-coated to a wide variety of RAL colours

## Dimensions

- Width x height maximum: 1000 mm x 1000 mm
- Width x height minimum: 277 mm x 377 mm

## Control Enclosure versions

The dimensions of the control enclosure CC-5000 neXt (along with our existing series CC-3000, CC-4000 and CC-4000 SL) are freely selectable. Nine possible depths are available. The obtained installation depths range from 53 mm to 334 mm. The width and height dimensions are offered up to 1000 mm in either direction.

Frames can be used in individual or multiple combinations. Innovative console configurations are possible thanks to a connecting element which has been designed in line with the new design.

☒ Checklist CC-5000 neXt on page 94.

## Modular system

## Approvals

c UL us  
(label on demand)

## Front panel

- Internally-mounted front panel through clamping tie bar
- Machining for integrating IPCs or Panel-PCs, push buttons and interfaces or engravings on demand
- Screen print according to your specifications

## Individual colour combination

You are even able to personalise the colour of the enclosure to your specific corporate identity. Corner modules, front and rear panel, as well as the sections can all be optionally powder-coated to a wide variety of RAL colours. The corner modules are powder coated to RAL 9006 as standard, and the extruded sections are anodised (see CC-5000 neXt on page 74).

## Console version

### System features

For console versions, the keyboard is located in a separate housing. The coupling head specially aligned to this enclosure series makes the control panel (upper section) and the keyboard console (lower section) a compact unit.

The keyboard console can be inclined downwards by 20 degrees (when the control panel is positioned vertically) or 10 degrees (when the control panel is inclined backwards by 10 degrees).

# Modular Aluminium Control Enclosure CC-5000<sup>next</sup>

## Highlights

### Hinge

- New concealed hinge design
- Hinge is unseen when door is closed
- Unique in the market today

### Door centring

- Door centred via alignment feature
- Invisible in closed position
- Secure door closing

### Optional signal light

- Signal light integrated in the design (RGB-LED)

## Individual frames

External dimension	Internal dimension	Horizontal section		Vertical (handle) section	
75 mm	53 mm				
125 mm	103 mm				
185 mm	163 mm				

## Double frames (see figure vertical handle sections)

External dimension	Internal dimension	
150 mm (75 + 75)	114 mm	
200 mm (75 + 125 or 125 + 75)	164 mm	
250 mm (125 + 125)	214 mm	
260 mm (75 + 185 or 185 + 75)	224 mm	
310 mm (125 + 185 or 185 + 125)	274 mm	
370 mm (185 + 185)	334 mm	

# Modular Aluminium Control Enclosures CC-4000 and CC-4000 SL

## Product features

- Custom versions can be supplied to meet individual customer specifications (see "Checklists" chapter)
- Simple and modern industrial design
- Freely selectable width and height (max. 800 x 800)
- Depths from 52 mm up to max. 646 mm
- High-quality aluminium casting with surface finish
- Coloured areas that emphasize the design
- Single-walled aluminium sections that provide outstanding heat dissipation
- Integrated handle elements with vertical section
- Protection class IP65
- Front panels internally-mounted or externally-mounted
- Simple installation of control units, or visualisation devices, thanks to all-round mounting grooves inside the enclosure

## Product features SL (in addition to CC-4000)

- Two enclosure depths (55 and 99 mm)
- Slimline design

## Approvals

- c UL us (label on demand)
- TÜV

Checklist CC-4000 on page 98 onwards.

CC-4000 SL with partition and externally-mounted two-row operator control panel

- Externally mounted front panel:  
Inner depth = Outer depth – 14 mm
- Internally mounted front panel:  
Inner depth = Outer depth – 20 mm

## CC-4000

Thanks to a variant modular system, we are able to offer enclosures according to customer needs. The desired width or height can be achieved by cutting and processing the sections. Based on our aluminium frame sections, depths from 52 mm up to maximum of 646 mm are possible.

### You determine the type of access

- Hinged rear panel
- Frame section as front door for hinged mounted controller
- Frame section as rear door with articulated hinge (fixed or detachable) for servicing purposes

The single-walled aluminium section offers superior heat dissipation. In double-walled enclosures, the entrapped air acts as an insulator. Rear panel heatsink, internal ventilators or climate devices can be used for challenging applications. You will find further information in our accessory program for control enclosures.

The BERNSTEIN suspension systems are ideal for attaching control enclosures to machines, walls or the floor (see "suspension systems" chapter). Selection of the suitable system depends on the arm length and the total weight of the enclosure. We would be pleased to assist you in selecting the right system for your application.

Opening CC-4000 enclosure from front with hinged frame section

Opening CC-4000 enclosure from rear with flush-closing door

Detaching entire frame section

Ergonomically formed handles make safe handling easy

Generously sized cable channels and all-round mounting grooves to install control units

Different enclosure depths thanks to the combination of frame and extension sections

## Front section SL version

128 mm	128 mm	
228 mm	228 mm	

# Modular Aluminium Light-Duty Control Enclosure CC-3000

## Product features

- Custom versions can be supplied to meet individual customer specifications (see "Checklists" chapter)
- Monitor-based industrial design
- Freely selectable width and height (max. 600 x 600)
- Customised colours from RAL range
- Five possible enclosure designs
- Optimum heat dissipation due to single-walled sections
- Front panels internally-mounted or externally-mounted
- Protection class IP65
- Screw-fixed or hinged rear panel
- Rear panel attachments without restricting installation space
- Internal grooves for fixing components
- Extensive range of accessories (see chapter „Accessories“)

## Material

- Extruded aluminium section Al Mg Si 05
- Pressure die-cast aluminium corners Al Si 12
- Seals between section and corner module Plastic
- Seal between front panel and rear panel CR
- Hinge, articulated hinge Al Mg Si 05
- Front panel, rear panel Al Mg

## Colour

- Sections naturally anodised
- Front panel, rear panel naturally anodised
- Corner modules RAL 9006

## Approvals

c UL us  
(label on demand)

 Checklist CC-3000 on page 102.

No handles

Handles on left and right

Handles on left, right and bottom (U-shaped)

Handles all round

Besides width, the height and depth can also be freely selected:

- Door hinge mounted on left or right
- Machining of the enclosures for mounting suspension systems
- Colour of corner modules
- Ready-to-use front panels according to customer specifications (incl. screen print or engraving)
- Specific preparation and wiring (see page 12, „System Solutions“)

A checklist will help you to define the required enclosure configuration while also serving as enquiry and order form (see page 102, „Checklists“).

## Modular Aluminium Light-Duty Control Enclosure CC-3000

Fixed rear panel

Hinged rear panel with lock

The rear panel can be screwed down or configured as a door. The door version is used with hinges or articulated hinges and the installation space is not restricted.

Internally-mounted front panel

BERNSTEIN offers a practical assembly system to make installation simple - machining of the front plate is not necessary in this case. The fixing elements can easily be moved inside the enclosure, making it easier for the user to adjust if required.

Externally-mounted front panel

The advantages of an externally mounted front panel are that there is no longer a profile edge, and an additional installation space is created. Elements including threaded studs welded on the back of the front panel enable fixing - the same applies when the door extension is used.

### Built-in components

The extruded aluminium section features all-round grooves, allowing components to be simply secured with spring nuts without the need for mechanical modification to the enclosure.

All-round mounting grooves simplify installation

## Frame section

External dimension	Internal dimension	Horizontal section	Handle section
120 mm	103 mm

Example photo Double frame

## Attachment solutions for control enclosures

### Single coupling head (suspended console version)

Article number 9808013100

The coupling head (single) combines the upper section of the console that is attached to a suspension system from above with the lower section. The lower section of the console can be seamlessly adjusted between 0 and 30°. Through the installation openings to the sides, cables can easily be positioned. The coupling head is available in RAL 7035 or in RAL 9006. Other colours are available on request.

### Double coupling head (console version with suspension system attachment)

Article number 9808013000

The coupling head (double) combines the upper section of the console with the lower section. The suspension system is attached using a CS-3000 coupling head. An infinitely variable angle adjustment of the upper section (0 - 30°) and of the lower section (0 - 20°) is possible. The coupling head is available as standard in RAL 7016 and in RAL 9006, other colours are available on request.

### Coupling head CC-5000 neXt

The coupling head section is particularly suitable for applications where the focus is on a design-based solution. The section offers a very solid connection when using heavy and large enclosures thanks to plane support. The rear side has an installation opening for optimal cable leadthrough. The section is anodised and the side caps are offered in RAL 9006 as standard - other colours can be defined when filling out the checklist.

### Rigid coupling head

Article number 9806493000

For the attachment of the console upper section to the lower section. The lower section of the console is fixed and inclined by 30°. The cable channel is realised by the coupling head. The coupling heads are coated similar to RAL 9006. Set of 2 pieces, complete with installation material.

**Single stand**  
Article number 1016786000

**Console stand**  
Article number 1016787000

**Stand CC-3000**  
Article number 1016509100

Upright stand with integrated coupling head for hinged attachment (infinitely variable adjustment from 0° to 30°) on BERNSTEIN control enclosures. Colour RAL 7035  
Complete with installation material and instructions; mechanical machining in control enclosures is necessary.

Upright stand with integrated coupling head for hinged attachment of BERNSTEIN control enclosures (infinitely variable adjustment from 0° to 30°) and keyboard enclosures (infinitely variable adjustment from 0° to 20°). Colour RAL 7035  
Complete with installation material and instructions; mechanical machining in control and keyboard enclosures is necessary.

Upright stand with straight column for mounting control enclosures. Coated similar to RAL 7035. Please order castors and coupling components separately.

Tube 80 with cable channel

**Industrial castors**  
Article number 9808012800

Set of castors, consisting of 4 swivel wheels. Complete with installation material and instructions. Load-bearing capacity of each castor 50 kg  
Construction height 100 mm  
Castors Ø 75 mm

**Equipment castors**  
Article number 9808015300

Set of castors, consisting of 4 swivel wheels, including 2 with brake. Complete with installation instructions. Load-bearing capacity of each castor 70 kg.  
Construction height 90 mm  
Castors Ø 75 mm

**Support feet**  
Article number 9808012900

Vertically adjustable feet (1 set = 4 pieces). Complete with installation material and instructions.

Adjustable construction height approx. 37 - 50 mm

## Accessories for control enclosures

### Accessories for control enclosures

#### CC-3000, CC-4000, CC-4000 SL and CC-5000

BERNSTEIN not only offers innovative control enclosures that can be perfectly configured to suit your specific requirements with our comprehensive range of accessories that you will find on the following pages but our system solution service also realises complete enclosure solutions.

#### The range of accessories covers the following areas:

- **Attachment solutions**  
Whether suspended, upright or mobile – we have the right system for any configuration.
- **Interface solutions**  
With the interfaces laptops, programming devices, diagnostic facilities, modems etc. can be easily connected to built-in components for servicing purposes. Simply open the cover and connect. Protection class IP65 is retained (cover closed).
- **Keyboard solutions**  
Data input devices do not always have to be in the way. We have available excellent solutions for storing such devices and cleverly integrating them in the overall concept while retaining the user-friendly ergonomics of the system.
- **Handle solutions**  
The BERNSTEIN range of accessories also includes practical handles to ensure the enclosures are handled safely.
- **Safety solutions**  
Your safety is our concern – we therefore offer a range of accessories that help and protect.
- **Heat dissipation solutions**  
Heat dissipation is a key problem which we will gladly resolve for you. Take the easy way out and contact us. We have the right enclosures, suitable equipment and the necessary know-how to effectively solve heat dissipation problems.
- **Cable solutions**  
It is often necessary to route cables into the enclosure – whether single core or preassembled cables, we have the right solution.
- **Front panel solutions**  
The front is the most important side of the enclosure. Here everything must be right and should look exactly as you imagined. Take advantage of our service to help you find the appropriate accessories.

**Our comprehensive range of accessories is listed on the following pages.**

## Free-standing column CS-4000<sup>neXt</sup>

### Flexible concept as console or column configuration

The new suspension system CS-4000 neXt ideally combines ergonomic visualisation and optimum integration of operating and input devices.

The console and column version design offers individual solutions for customer specific applications.

In contrast to traditional suspension system visualisation solutions with individual screens or IPCs, the CS-4000 neXt fulfills the requirements of the Machinery Directive through the integration of emergency stop devices.

#### Product features

- High protection class IP65 at area of closed column chamber
- Internal cable routing
- IPC and keyboard shelf holder can be positioned individually
- IPC holder with graduated tilt control
- Optional integrated control elements (to fulfil the Machine Directive 2006/42/EG)
- Column of high-quality extruded aluminium sections (naturally anodised, 2-chamber column)
- Customer-specific length of the column possible

#### Scopes of application

- Production lines in the automotive industry
- Plant and machine construction with decentralised controlling concept
- Decentralised display or HMI positioning

CS-4000<sup>neXt</sup>

Console version

Column version

- ① Column
- ② Slider or mounting element
- ③ IPC with holder: Mounting height variable, graduated tilt control
- ④ Push button cover for control elements
- ⑤ Keyboard shelf (pull-out mousepad is optional)
- ⑥ Cable conduit cover (access through open column chamber)
- ⑦ Base – fixed or rotatable

Extensive accessories see on page 113

## Free-standing column CS-4000~~next~~

### The compact console version

#### Fixed tilt angle

- Fixed tilt angle of 35°
- Suitable for VESA 75/100, 48 mm round tube (customer specific attachment on request)

#### Tilt adapter flex for console column

- For the adjustment of the IPC tilt angle for console configurations
- Inclination in 5° steps adjustable from 0° to 60°
- Star grip for locking the selected position
- Suitable for VESA 75/100, 48 mm round tube (customer specific attachment on request)
- Optional gaiter for IPC with open connection area

## Ergonomic measurements according to DIN 33402-2

### Console version

- Max. height 1350 mm for 35°
- Direct assembly of the IPC on tilt adapter
- Inclination in 5° steps adjustable from 0° to 60°
- Keyboard height (standard value 1,000–1,100 mm)
  - Bottom edge of keyboard 950–1,100 mm
  - Corresponding fixing position of the mounting element / slider

### Column version

- Visualisation height (standard value 1,650 mm)
  - Centre of the screen  $1,650 \pm 50$  mm
  - Corresponding fixing position of the mounting element / slider
- Desk area height (standard value 1,000 - 1,100 mm)
  - Lower edge of the keyboard 950 - 1,100 mm
  - Corresponding fixing position of the mounting element / slider

## Free-standing column CS-4000~~next~~

### Base plate versions

#### Fixed base plate

- Cable entry into the open column chamber ①
- Connection for potential equalisation ②
- Optionally supplied with levelling adjustment screws

#### Rotatable base

- Angle of rotation 300° with limit stop
- Protection degree IP65
- Installation area for mounting the cable entry system (e.g. Icotek KEL, Contaclip KDSClick) for cable entry into the closed column chamber ①
- Connection for potential equalisation ②
- Optionally supplied with levelling adjustment screws

### Aluminium column with double chamber system

- Closed column chamber ① (Protection degree IP65)
- Open column chamber ② for IPC and keyboard shelf holder positioning and cable routing
- Cable routing via open column chamber
- Open column chamber (back side) optically closed through brush strip

## Slider Individual height adjustment

### Product features

- Height adjustable without tools
- Simple fixing of the adjusted position through star grip
- Linear guide with sliding elements
- Limit stops for constraining and securing adjustment travel

## Mounting element for a fixed height

### Product features

- Mounting element for IPC and keyboard shelf holder positioning
- Subsequent change of position only by tool
- Limit stops for constraining and securing adjustment travel

## Free-standing column CS-4000~~next~~

### IPC holder – Variable height and tilt adjustment

- Height variable through mounting element ❶ (tool-bound) or slider ❷ (without tools) freely selectable
- Connection of IPC/display/monitor with VESA 75/100 or Ø 48 round tube
- Maximum inclination  $\pm 24^\circ$  (depending on connection type)

### Possible connection type

#### VESA 75/100

Connection from behind

#### Siemens Pro

Connection from below

#### Round tube Ø 48 mm

Connection from below

#### Round tube Ø 48 mm

Connection from above

## Keyboard shelf – Choice of two versions

### Fixed keyboard shelf

- Height variable through mounting element/slider
- Extruded aluminium sections (naturally anodised)
- Optional mousepad to be pulled out to the right or left side ❶
- Fastening option in the back cover ❸

### Adjustable keyboard shelf

- Height variable through mounting element/slider
- Extruded aluminium sections (naturally anodised)
- Optional mousepad to be pulled out to the right or left side ❶
- Maximum possible depth adjustment 100 mm ❷
- Fastening option in the back cover ❸

## Control console

### Integration of all necessary command modules and signal units

The emergency stop function is still fully guaranteed in case of necessary replacement of the IPC.

For the installation of ...

- Command and signalling devices such as push buttons, emergency stop buttons, etc.
- Main switches, key switches
- *Electronic KeySystem* (EKS) – Transponder-based read/write stations
- Adaptable in width individually
- Extruded aluminium sections (naturally anodised)
- Adaptation to keyboard shelf
- Screw-fixed rear panel

## Free-standing column CS-4000~~neXt~~

### Covers and inspection window with various equipment variants

#### Push button cover

- Cover for control elements
- Optional integrated emergency stop device and key switch
- Maximum of 5 push buttons or 3 push buttons with identification label
- Installation from the front
- IP65 due to foamed sealing
- Installation area 165 × 60 mm

#### Cable conduit cover

- Cable conduit cover with 45-degree bevelled curve for optimum bending radius
- Cable entry into the closed column chamber ①
- IP65 due to foamed sealing
- Maximum installation area 2 × M25

#### Inspection window cover

- For monitoring and control of signalling and built-in devices such as MURR compact module
- Aluminium cover with acrylic glass cover
- Compatible with CS-4000 neXt column section
- Adaptable to AIDA mixing module

#### Aluminium cover

- Main switches
- Machine operator identification systems
- Key Panels

## Accessories

### Universal tray

- Safe storage area for printers, PC hardware or similar periphery units
- Fixing to the assembling element or slider on the back side of the column
- Individual mounting on left, on right or even on both sides
- Storage area 450 × 300 mm (adjustable according to your wish)

### Box PC holder

- For safe storage of customary box PCs
- Front side with opening flap – lockable with customary sash locks, e.g. two-way bit
- Protection degree IP65
- Cable entry via closed column chamber
- Inside dimensions (LxWxH): 210 x 60 x 215 mm

### Cable channel

### Gaiter channel

### Signal lamp cover

# Selection criteria for suspension systems

## Mechanical load

Different types of suspension systems can support different loads. The most important parameter when determining the right type of suspension system is the mechanical load in the respective application, which consists of the suspended enclosure with its built in components and the length of the extension arm.

After determining the suspended weight and the length of the extension arm in the suspension system, the overview opposite will help you select the right system.

Please note that when using a turn / tilt coupling for mounting the enclosure at the end of the suspension system, the enclosure itself should not exceed a load of 300 N.

### Calculation of force F (system load) as a function of enclosure weight m:

$F\text{ (N)} = m\text{ (kg)} \times g\text{ (ms}^{-2}\text{)}$

### System load F = enclosure weight m multiplied by acceleration due to gravity

$F\text{ (N)} = m\text{ (kg)} \times 9,81\text{ (ms}^{-2}\text{)}$

The illustration opposite shows an overview of the various suspension systems. You will find more detailed information on the exact loads of the individual systems in the following sections.

**Performance**

- Configuration options
- Mechanical stability
- Resistance

High →

# Light-Duty Suspension System CS-2000 SL 45 / 60

The CS-2000 SL light-duty suspension system is specially designed for accepting small, lightweight control enclosures and features short extension arms. In addition to the components in light grey RAL 7035, a version in white aluminium RAL 9006 is now available that elegantly complements our CC-3000, CC-4000 / CC-4000 SL and CC-5000 neXt control enclosures (see page 72 onwards).

## System structure

Individual components of the suspension system are combined with an optionally closed or partially open aluminium connection section to achieve the required configuration in accordance with the load diagram (with the exception of panel couplings).

## Load diagram

The above diagram shows the load bearing capacity of the CS-2000 SL range of suspension systems (with the exception of panel couplings).

The load bearing capacity of the system changes depending on the type of connecting section used (partially open or closed) or whether an intermediate joint is used.

The following safety factor generally applies:

With an additional load of 75 kg, the suspension system can be subjected to load for 5 seconds without plastic deformation occurring.

The overview on pages 114 / 115 is designed to help you determine the load bearing capacity of all BERNSTEIN suspension systems.

CS-2000 SL Standard  
RAL 7035 light grey or  
RAL 9006 white aluminium

## Materials

- Components: cast aluminium
- Installation opening: POM
- Bearing: POM
- Seals: CR
- Extruded aluminium connecting section
- Connecting section covers on open section: EPDM

## Colours

- Suspension system components:  
light grey RAL 7035  
alternatively: white aluminium RAL 9006
- Connecting section:  
silver (natural) anodised

## System features

Installation opening at all joints

- Optionally closed or open connecting section can be used
- Clear passage opening in closed system:  
ø 40 mm = 12.5 cm<sup>2</sup> at narrowest point (bearing opening)
- Clear passage opening in partially open system:  
– 2.76 cm<sup>2</sup> at narrowest point (entry of section in components)  
– 7.40 cm<sup>2</sup> in closed tube
- Easily retrofittable swivel angle limitation on couplings and joints
- Couplings have a small narrow flange for mounting on very narrow enclosures
- Overhead installation of all components possible
- Protection class IP65 (closed aluminium connection section)

## Enclosure preparation for mounting couplings

The geometry of the flange on the straight coupling and on the elbow coupling makes it possible to mount even extremely narrow enclosures. Two centrally arranged threads, with which the coupling is secured to narrow enclosures, are additionally provided for this purpose.

However, the coupling is mounted as standard by means of the four outer flange mounting threads, compatible and interchangeable with the flange mounting pattern of the CS-3000 suspension system. With a diameter of 43 mm, the hole for the cable leadthrough is adapted to the narrowest point in the suspension system (a minimum diameter of 40 mm is available in the bearing opening in the components).

# Light-Duty Suspension System CS-2000 SL 45 / 60

Load, panel components

## Mechanical properties

Max. load G	250 N
Max. System length L	1500 mm

## System combinations

The large number of components and different versions of the connecting sections enable many different combinations. A selection of the possible configuration is shown below

Drawing for preparing enclosure rear panel for attaching panel couplings

# Connecting Section CS-2000 SL 45 / 60

## Assembling the connecting sections

[A] Open or closed section in straight coupling and elbow coupling:

Adhere seal to connecting section (1), fit connecting section in suspension system component (2, 3).

[B] Closed section in suspension system components with eight mounting screws:

Adhere seal to connecting section (1), fit connecting section in suspension system component (2, 3) while adjusting the section.

[C] Open section in suspension system components with eight mounting screws:

Adhere seal to connecting section, fit connecting section in suspension system component, only fit the four mounting screws on the closed part of the tubing, install cover seal.

## Connecting sections

The connecting section is a drawn aluminium AlMgSi 0.5 bar. The surface is anodised and therefore corresponds to a colour similar to RAL 9006. The connecting section can be used both in open as well as in completely closed cable ducts. The partly open section has an EPDM cover, coloured similar to RAL 7042. This flexible plastic cover can be easily withdrawn and reinserted.

Open section

## BERNSTEIN Aluminium Suspension Systems

### CS-3000 and CS-3000<sub>next</sub>

flexible, easy to assemble, ergonomic

### CS-3000

### Application examples for CS-3000 / CS-3000<sub>next</sub> suspension system – Versatile configuration options

The numerous modules and components allow for flexible system configuration. This ensures the suspension systems can be uniquely adapted to local conditions and fit perfectly in machine and system environments.

## Suspension System CS-3000 Family

### Flexible and efficient: The BERNSTEIN CS-3000

In the main, system constructors expect modern suspension systems to feature variable configuration, progressive design and complete ease installation.

BERNSTEIN sets standards with the CS-3000:

Modern industrial design, well-conceived ergonomics!

The combinable components create an innovative system solution based on modular principles for attaching enclosures, especially the BERNSTEIN CC-3000, CC-4000, CC-4000 SL and CC-5000 neXt enclosures (see page 72 onwards), to machines and systems.

The particular ease of assembly and installation of the CS-3000 is reflected in substantial time savings and cost efficiency.

### Load diagram for static load capacity CS-3000

**In addition to the positively locking tube mounting screws other features include:**

- **Six-fold form-fit** thanks to component contour in tube attachment area (the otherwise optional safety hole additionally required for overhead installation is rendered unnecessary)
- **One-man installation** of the complete system
- **Infinitely variable system alignment** by means of tube mounting screws
- **Subsequent alignment** at any time without dismantling the complete system
- Cable and installation openings at all joints in the system
- Different tube lengths for variable configuration
- Tube machined at one end can be cut to required length (machining templates supplied)
- **Adjustable torque**  
Fine adjustment of firmness by means of clamping lever or screw

Intelligent design with smooth flowing transition lines for ease of cleaning

Six-fold form-fit thanks to component contour in tube attachment area

Effortless readjustment possible at any time without the need to dismantle the complete system

#### Other system features:

- Anodises aluminium tubes for long service life and reliable operation
- Smooth flowing transition lines from the tube to other components prevent dirt built-up (easy to clean)
- Coated tube mounting screws for sealing threaded holes and secure screw connections
- Elegant appearance with narrow sections connected by adapting the cross section from square to round tube
- Modular coupling configurations possible (also subsequently), e.g. with adapter for narrow enclosures or tilt adapter
- Well-conceived ergonomics for easy and virtually fatigue-free operation
- An ideal single-source solution for BERNSTEIN control enclosures
- Protection class IP65

# Suspension System CS-3000 *neXt*

## Technology meets design: The BERNSTEIN CS-3000 neXt

The CS-3000 neXt combines functionality with an appealing design. The new system is an important addition to the CS-3000 series, it is easy to clean and benefits from simplified installation, outstanding visual characteristics such as smooth transitions between tube and component and the high quality which BERNSTEIN is known for. The wide range of components, the high strength of the system and the load capacity provide individual solutions.

### Standard colouring:

Components finished to RAL 9006 white aluminium or

RAL 7016 anthracite grey

Connection section: Natural anodised finish

Components (incl. caps) and connection sections can be optionally special-coated to a wide variety of RAL colours.

## Highlights

Turn/tilt coupling S  
for CS-3000 and CS-3000 neXt

Turn/tilt coupling W  
for CS-3000 and CS-3000 neXt

CS-3000 neXt Aluminium connection section				
	Standard lengths (available from stock)		Article number	Weights in kg
	Tube cross section x Length			
	Length 55 x 75 x 250 mm	9524700001	0.90	
	Length 55 x 75 x 500 mm	9524700002	1.70	
	Length 55 x 75 x 750 mm	9524700003	2.60	
	Length 55 x 75 x 1000 mm	9524700004	3.40	
	Length 55 x 75 x 1250 mm	9524700005	4.30	
	Length 55 x 75 x 1500 mm	9524700006	5.20	
				
CS-3000 Aluminium connection section				
	Tube cross section x Length			
	Length 70 x 90 x 250 mm	9524500001	1.30	
	Length 70 x 90 x 500 mm	9524500002	2.50	
	Length 70 x 90 x 750 mm	9524500003	3.70	
	Length 70 x 90 x 1000 mm	9524500004	5.00	
	Length 70 x 90 x 1250 mm	9524500005	6.20	
	Length 70 x 90 x 1500 mm	9524500006	7.50	
	Length 70 x 90 x 1750 mm	9524500007	8.70	
	Length 70 x 90 x 2000 mm	9524500008	10.00	
	Tubes machined at one end (machining templates supplied, available from stock)			
	70 x 90 x 1000 mm	9524500009	5.00	
70 x 90 x 2000 mm	9524500010	10.00		
If one of our standard lengths does not suit your requirements, we can also supply tubes machined at one end. Simply shorten to the required length and use the supplied template to machine the shortened end.				
				
CS-3000 neXt				
Round aluminium tubing				
Round aluminium tubes are available in different lengths. We can also supply completely machined tubes to the length you require. (prices and delivery time on request)				
	Diameter x Wall thickness x Length			
	Length 48 x 4 x 250 mm	9521400000	0.40	
	Length 48 x 4 x 500 mm	9521401000	0.80	
	Length 48 x 4 x 750 mm	9521402000	1.10	
	Length 48 x 4 x 1000 mm	9521403000	1.50	
				
Special tube lengths		Machined tubes to required lengths		
		We can also supply completely machined tubes to the length you require (price and delivery time on request).		
Drilling label for special tube lengths				
		Using the template, bore the holes in the exact positions. Choose the appropriate connection section and order the number of drilling templates required.		
		CS-3000	9012267000	
		CS-3000 neXt	9012328000	
Drilling jigs for special tube lengths				
		Once the tube has been cut to its desired length, drilling jigs can be fitted. The jigs ensure a stable base and help prevent tube damaged. The integrated drill bushes specify the location of the threaded holes and guide the drill.		
		CS-3000 (Four-part set)	9806935000	
		CS-3000 neXt (Three-part set)	9806936000	
Tube adapter for CS-3000 for special lengths without tube preparation				
	Once the tube had been shortened, the adapter can be screwed to the tube. The tube adapter can then be fixed to the component and the system can be adjusted as required.			
	Attention: Install the tube adapter only onto the housing side, see application example on page 153!			
	Additional information is also available on page 153.			
	RAL 9006 white aluminium		1015300208	0.70
	RAL 7016 anthracite grey		1015300039	0.70

# Suspension System CS-3000

## CS-3000 HV – Vertically adjustable modules for optimum ergonomics

With the vertically adjustable CS-3000 HV, BERNSTEIN offers an innovative expansion to the CS-3000 suspension system. Flexible height adjustment and internal cable routing make the HV version even easier to install and operate.

With a variable lift range of 250 mm, the support system can be adjusted infinitely variable to the required working height. The integrated gas-filled damper system ensures the enclosure can be raised with minimum effort while preventing it from dropping suddenly after the clamping lever is released. This means added convenience but above all greater safety.

The CS-3000 HV is available as an optionally mobile stand base or wall-mounted version and can be easily integrated in an existing CS-3000 system.

### Overview of advantages:

- Thanks to the 250 mm variable lift, the ideal viewing height can be adjusted for each operator
- Gas-filled damper system provides effective support during lifting and prevents the supported enclosure dropping suddenly after the clamping lever is released
- Internal cable routing
- Straightforward integration in CS-3000 suspension system

### Selection criteria

- Selection of the size of gas-pressurised damper depends on the total weight and the ambient temperature
- The total weight is calculated from:  
Enclosure + installed equipment + coupling components

Article numbers see page 150 onwards

Ambient temperature	40°C	100 N (6–11 kg)	150 N (11–19 kg)	200 N (19–29 kg)	300 N (29–39 kg)
	30°C	100 N (5.5–10.5 kg)	150 N (10.5–18 kg)	200 N (18–27.5 kg)	300 N (27.5–37 kg)
	20°C	100 N (5–10 kg)	150 N (10–17 kg)	200 N (17–26 kg)	300 N (26–35 kg)
Damper force / total weight					

### Materials

- Anodised aluminium tubing
- Pressure die-cast aluminium components
- Polyamide covers for installation openings
- POM bearing
- Neoprene seals

### Colours

- Suspension system components:  
RAL 7016 anthracite grey / RAL 9006 white aluminium
- Connecting tubes: silver (natural) anodised

# Heavy-Duty Suspension System CS-2000 System 80

With its large number of components, the BERNSTEIN CS-2000 System 80 suspension system offers technically perfected solutions for a wide range of applications.

## System structure

The following conditions are decisive for selecting the right system:

- Load of overall system
- Clear cable leadthrough if necessary
- System constellation

After determining the correct size of suspension system, the corresponding components and tubes are selected to build up the required system constellation.

## Load diagram

The overview on Pages 114 / 115 is designed to help you determine the load bearing capacity of all BERNSTEIN suspension systems.

## Materials

- Aluminium components: cast aluminium
- Cast steel components: GGG 40
- Welded steel structures: St 37
- Support tubes: St 37
- Bearings: St/PTFE or POM
- Seals: CR
- Installation openings: cast aluminium
- Gaiters: PVC

## Colours

- Suspension system components: light grey, RAL 7035
- Gaiters: light grey, RAL 7035
- Tubing: light grey, RAL 7035

## System features

- Installation openings at all joints for easy cable installation
- Integrated strain relief for gripping cables
- Maintenance-free no-play bearings in all joints and couplings
- Adjustment facilities for precisely aligning support tubes
- Wall and intermediate joints with adjustable torque and retrofitable swivel angle limiter (available as accessory)
- Flange couplings with adjustable firmness and retrofitable rotation angle limiter
- Overhead installation of all components possible

## Connecting Tube CS-2000 System 80

## Tubing

The steel tubes for the CS-2000 System 80 suspension system are available in different lengths (tube lengths in accordance with DIN 7168).

The steel tubes are supplied powder-coated in RAL 7035 (light grey).

Weight: 11.0 kg/m

Available tube lengths			
	Length mm	Article number	Weights in kg
	250	9527114000	2.70
	500	9527115000	5.30
	750	9527116000	8.10
	1000	9527117000	11.00
	1250	9527118000	13.50

# Stainless Steel Suspension System CS-480 NR

## Product features

The CS-480 NR suspension system was specifically developed for mounting control enclosures in hygienic areas in the food and pharmaceutical industries.

Thanks to the variety of different models, the CS-480 NR ensures absolute flexibility. You have the choice between a combination of tubes shaped to customer specifications and suspension system components or, if time is pressing, you can combine the preshaped tubes and coupling sleeves available from stock with the suspension system components.

## System features

- Installation openings at bearing components with horizontal outlet
- Easy mounting by clamping the support tubes
- Load bearing capacity 400 N at 1 m
- Protection class IP66/NEMA 4X
- Material 1.4305
- Torque preset at factory

## Enclosure preparation for mounting couplings

The dimensions of the coupling hole pattern for preparing the enclosure are shown in the following drawing.

## Materials and surfaces

Stainless steel support tubes 1.4301  
 Stainless steel components 1.4305  
 Bearings POM  
 O-rings NBR

## Load diagram

Refer to the diagram for the load bearing capacity of the CS-480 NR suspension system. Approval for higher loads is to be obtained separately. The system length  $l$  refers to the length specification in the diagram.

The overview on Pages 114 /115 is designed to help you determine the load bearing capacity of all BERNSTEIN suspension systems.

## System combinations

The following selection illustrates the high degree of flexibility that can be achieved in configuring the suspension system:

### Support tubes

Support tubes with 48.3 mm outside diameter; wall thickness 3.6 mm, straight tubes

	Length mm	Article number	Weights in kg
	250	9523501000	1.00
	500	9523502000	1.90
	750	9523503000	2.90
	1000	9523504000	4.10
	1250	9523505000	4.90
	1500	9523506000	5.80

### Increased flexibility with L-shaped tubes and coupling sleeves

The use of L-shaped tubes and coupling sleeves together with straight support tubes can render unnecessary time-consuming manufacture of support tubes to customer specifications, L-shaped tubes

	Length mm	Article number	Weights in kg
	250 x 250	9523500001	1.80
	500 x 500	9523500011	3.60
	Coupling sleeve	1013051200	

### Support tubes to customer specifications

Different versions of formed support tubes for the BERNSTEIN CS-480 NR suspension system are available on request. To order customised tubes simply quote the shape (e.g. straight, L-, U- or Z-shaped) and the dimensions.

#### Note:

Dimension B and C min. 220 mm; dimension A in U and Z version min. 320 mm
